STOP THE BACK-ACHE

Place Concrete in Hard to Reach Areas... the easy way

Simple

No moving parts: no flimsy chutes to get torn up, no gates to freeze up with old concrete, no hydraulics to get contaminated with dust and dirt. Works better than complicated systems costing thousands of dollars.

Rugged

Built to take the abuse of a fast moving construction job. Reinforced corners strengthen the sides. The bottom is protected and strengthened by 1/2" thick steel bars. Overall rugged construction ensures dependability, pour after pour. This is an attachment you can use, set in the yard, and know it will work when you come back to use it.

Inexpensive

Simple, straight-forward design keeps costs low. Typically pays for itself on the first pour.

Extra High Back helps keep "concrete splatter" off the loader

MODEL	120	125
Bucket Capacity	1/2 cuyd	3/4 cuyd
Overall width	55"	77"
Discharge Opening	10"	12"
Empty Weight	420 lbs	585 lbs
Minimum Loader Cap.	1,350 lbs	3,000 lbs

Caution: Do not exceed capacity of loader - Concrete weights vary - Calculate load before using.
