

CONCRETE BUCKET

The Star Industries 1500 Series of concrete buckets is designed with a reduced height, to make filling from a redi-mix truck easier. It's ideal for batching. These buckets are engineered to be attached to various types of equipment, such as cranes, excavators, or forklifts, allowing for easy transportation and placement of concrete.

- Reduced height for easy filling
- Center and side-chute unloading/pouring
- Multiple capacities available
- Operate via forklift or crane

PRODUCT OPTIONS

WHY THE 1500 SERIES CONCRETE BUCKET IS A 'MUST-HAVE' FOR ANY CONSTRUCTION SITE

- 1 Center and side unloading**
The 1500 Series comes with a detachable side chute for flexible and precise concrete delivery to even hard-to-reach areas.
- 2 Multiple sizes** The 1500 Series is available in different sizes with 1.0, 1.3 and 2.0 cubic yard capacities.
- 3 Regulation-conforming**
The 1500 Series is built to meet or exceed the regulations of ASME and come with the required labels, certificates and user and maintenance manual.
- 4 One-year warranty**
1500 Series is covered by a one-year warranty.
- 5 Simple design** A large lever operates two springs that open and close the discharge valve for efficient material flow and automatic gate closing.
- 6 Forklift adapter** Crane or Forklift Combo can be easily added by the optional forklift attachment allowing you to easily use any forklift.
