

SKID STEER EXTREME DUTY FORK GRAPPLE

Move palletized loads, logs, brush, and debris with greater control using the Star Industries Skid Steer Fork Grapple. Designed for agricultural, forestry, and construction applications, this attachment combines heavy-duty heat-treated forks with a powerful hydraulic grapple for secure load handling. The adjustable top tine accommodates both small and large loads, while dual grapple arms powered by 2" x 10" cylinders provide the clamping force needed to keep material secure during transport.

- ➔ Ideal for pallet handling, land clearing, and material transport
- ➔ Adjustable top tine accommodates a wide range of load sizes
- ➔ Available with 48", 60", or 72" fork lengths

FEATURES

- ➔ Dual-arm grapple design for secure load retention
- ➔ Powerful 2" x 10" hydraulic cylinders provide strong clamping force
- ➔ Heat-treated forks from tip to heel for maximum durability
- ➔ Handles palletized materials, logs, brush, and jobsite debris with ease
