

# SKID STEER HYDRAULIC W/T FORK FRAMES WITH FORKS

Move heavy palletized loads with confidence using the Star Industries Skid Steer Hydraulic Walk Through Forkframes with Forks. Designed for demanding agricultural, construction, and industrial applications, these forks combine a rugged 5,500 lb. load capacity with a convenient walk-through frame that allows safer, faster access to the operator cab. Available in multiple fork lengths and mount styles, they provide the strength and versatility needed for everyday material handling. **NOTE: We recommend 48" forks for use with this attachment!**

- 5,500 lb. load capacity for demanding lifting applications
- Walk-through frame design provides convenient operator access
- Available in 48", 60", and 72" fork lengths

## FEATURES

- Heavy-duty 45" wide frame with integrated step-through design
- Built for agricultural, construction, and industrial material handling
- Multiple mount options available, including Universal, Deere, and Euro
- Durable construction designed for long-term performance
